BiteSize

Your groceries, understood.

WHY BITESIZE?

Most tools look at only one piece of the problem. BiteSize connects grocery purchases, estimated nutrition, meal planning and spending context in one experience.

THE PROMISE

Help people make their next grocery basket better than their last one - without necessarily spending more.

Designed to feel calm, practical and non-judgemental.

SMARTER CHOICES, BEFORE YOU BUY.

"What if I changed this?"

Compare an original choice with an alternative and see estimated differences in cost and nutrition before deciding.

Can I get more protein within the same grocery budget?

What if I replace one snack with a lower-cost option?

What can I cook with what I already bought?

The app should show uncertainty and let users correct product, ingredient and portion data.

BiteSize

Your groceries, understood.

BETTER FOOD CHOICES. SMARTER SPENDING.

Eat well. Spend wisely.

MAKE EVERY BITE COUNT →

FROM RECEIPT TO INSIGHT

01 · Receipt Intelligence

Upload a receipt image, PDF or supported digital bill. BiteSize extracts item names, quantities, prices and discounts, then lets users correct uncertain matches.

02 · Nutrition Intelligence

Estimate the nutritional profile of the basket using verified product labels and recognised food data where available.

03 · Smart Grocery Budgeting

Set weekly or monthly budgets, view category breakdowns, compare price per unit and identify overruns or price changes.

Receipts reveal what enters the home.

FROM MEAL TO GUIDANCE

04 · Meal Photo Tracker

Photograph a meal, review estimated calories and nutrients, confirm ingredients and portions, then save it to a daily log.

05 · BiteSize AI Coach

Ask practical questions about groceries, meals, budgets and progress. Guidance should distinguish estimates from confirmed information.

06 · Pantry-to-Plate AI

Suggest meals based on groceries already purchased, cooking time, skill, dietary preferences and the desire to minimise extra purchases.

Meal photos help estimate what gets eaten.

PLANS, REWARDS & TRUST

SMALL BITE	Free
BIG BITE	Paid individual
SHARED BITE	Paid family

BITE CURRENCY

The concept proposes eligible rewards worth 7.5% of eligible monthly grocery spend, redeemable on eligible healthy and trusted groceries through First Club. Final funding, caps, eligibility and redemption rules must be agreed.

TRUST BY DESIGN

Meal-photo nutrition is an estimate, not a laboratory measurement. Users should be able to correct mistakes, control their data and keep personal meal logs private.

YOUR GROCERIES, UNDERSTOOD.
